

# 2S-101 Double-Sided Carpet Tape

Specifications

August 2020

<u>Material:</u>	Multi-purpose industrial grade double-faced cloth tape made with a natural light tan color. Backing is made of polyester/cotton blend cloth, and the adhesive is a synthetic/natural rubber adhesive.
<u>Color:</u>	Natural light tan
<u>Ingredients:</u>	Cloth, Rubber Adhesive
<u>Thickness:</u>	13.5 mils (0.34mm)
<u>Width:</u>	1.88 Inches (48mm)
<u>Length:</u>	106-feet (33 Meters)
<u>Tensile Strength:</u>	25lbs/in width
<u>Service Temperature:</u>	50°F to +200°F
<u>Advantages:</u>	(1) Removes cleanly with no residue. (2) Strong adhesion. (3) High tensile strength.
<u>Storage:</u>	Should be stored in a cool and dry place away from sunlight and moisture. Should be used within 12 months of purchase.
<u>Rubber Flooring:</u>	Rubber mats and flooring are generally heavy enough to lay down under their own weight. When using a two-sided carpet tape, permanent rubber flooring adhesives are not needed, making for an easy installation. Rubber mat adhesive products in a double-sided format make rubber flooring an easy DIY product. Since rubber floors are protective flooring and expect to see damage, using a permanent rubber floor glue is not a smart choice.
<u>Linoleum &amp; Vinyl:</u>	Linoleum adhesive and vinyl sheet flooring adhesive(s) if not applied correctly will cause damage to the product or the installation. By using thin double-sided flooring tape, consumers can remove the risk of damage and increase the ease of installation. Glued vinyl flooring is not easy to remove once a space needs to be redesigned. When installed with a double-sided carpet tape, it is brisk and easy to clean and remove.
<u>Availability:</u>	In stock for immediate shipment.
<u>California Prop 65:</u>	 <b>WARNING:</b> Cancer and Reproductive Harm - <a href="http://www.P65Warnings.ca.gov">www.P65Warnings.ca.gov</a> .
