

Eco-Safety Surfacing (3")

Specifications
August 2021

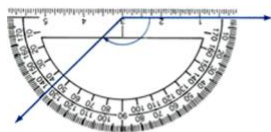

<u>Description:</u>	Made from recycled rubber tires, these interlocking tiles are a playground surfacing solution that is very easy to install. Each tile is an eco-friendly product that is available at an affordable price point. This 3-inch thick tile is available in 2 unique speckled color options. Thanks to the waffled bottom design on the tiles, they provide plenty of cushion and bounce-back whenever pressure is applied on them. Whether you have a large commercial playground or a small residential daycare, these tiles will be the perfect fit for the job!
<u>Material:</u>	60% Post-Consumer Recycled Rubber Content
<u>Gauge:</u>	3-inch
<u>Size:</u>	
<u>Tiles:</u>	19.5"- inch x 19.5"-inch, 28 lbs.
<u>Ramps:</u>	3/8" x 3" x 7.87" x 19.5" Ramps, 10 lbs.
<u>Hardness:</u>	40 Shore A
<u>Available Colors:</u>	Blue/White Speckled Tiles, Yellow/Red/White Speckled Tiles
<u>Applications:</u>	Amusement Parks, Anti-Fatigue Flooring, Apartment Roofs, Clubhouses, Cruise Ships, Cushion Flooring, Dance Floors, Daycares, Decks, Gyms, Indoor Playgrounds, Interlocking Floor Tiles, Flooring for Outdoor Applications, Outdoor Gym Mats, Outdoor Play Mats, Pet, Playground Surfacing, Playrooms, Protective Mats, Fast Food Facility Playground Mats, Recycled Flooring, Rock Climbing, Schools, Skateboarding.
<u>Superior Durability:</u>	The Eco-Safety tiles possess a superior level of durability thanks to the recycled rubber they are made from. They provide a good degree of anti-fatigue comfort and resilience against physically abrasive impacts. The tire rubber also helps in regards to their durability against outdoor weather factors like UV rays and moisture. The Eco-Safety tiles are durable enough to perhaps outlast your play equipment.
<u>Permanent Installations:</u>	In case your application requires the rubber tiles to be installed permanently in a specific location, the BASF CX-941 Adhesive is available. It allows the tiles to be glued onto wood and concrete surfaces. Installation instructions are available online. Please read the instructions carefully before using the adhesive glue.
<u>ASTM F1292-13 Test Report:</u>	These rubber tiles have been tested and cleared for a maximum critical fall height of 7ft. This safety rating is very important to the health and well-being of children while they play.
<u>Temporary Installations:</u>	Plastic connector pins are available for these playground floor tiles. Each pin is 3.5" long and made of hard plastic. The pins are meant to hold the tiles together and in place. Each Eco-Safety tile comes with holes on their four sides where the pins are inserted. The pins facilitate a fast and efficient installation.
<u>Outdoor Settings:</u>	Tires are made to withstand extremely harsh outdoor conditions. This is possible thanks to the large amounts of EPDM rubber in them. The EPDM rubber is transferred over to these tiles when the tire rubber is processed into this tile form. The Eco-Safety tiles have inherited the outdoor durability of the tire rubber used to make them, so they are sure to last for very long lengths of time.
<u>Cleaning Instructions:</u>	Cleaning these playground tiles is a very easy process. For simple indoor cleaning, all one needs is a broom, wet mop, or a vacuum. If outdoors area cleaning is required, a water hose, leaf blower, or brooms are perfect for use. These tiles can also be cleaned with mild household soaps and detergents. Please be aware that caustic agents like bleach should never be used as they can damage and discolor the rubber.

Eco-Friendly Product:

Recycled tire rubber is an environmentally friendly material. The non-biodegradable tires used to make these flooring tiles have been taken out of the ecosystem and put back to use in smart and efficient ways, such as in this flooring option.
