

Diamond-Grip Gas Station Mat

Specifications

January 2022

<u>Description:</u>	Made from rugged, outdoor-friendly vulcanized rubber material, this rubber mat is a quick and affordable way to protect your fuel sumps from physical harm, rain, and other contaminants. This larger-sized mat clocks in at a 54" diameter, making it capable of fitting over sump covers of all sizes within range.
<u>Material:</u>	Vulcanized Rubber
<u>Color:</u>	Black
<u>Weight:</u>	26lbs
<u>Thickness:</u>	6mm
<u>Size:</u>	54" Diameter
<u>Applications:</u>	Fuel Sumps, Outdoor Areas, Equipment Protection, Floor Protection
<u>Why Fuel Sumps?</u>	Fuel sumps are an important part of the day-to-day operations of gas stations. Fuel sumps are the access points where fueling trucks refill underground fuel storage tanks. In rainy conditions, water can flood the sump and cause fuel leakages. It is costly and time consuming for the operators of the gas station to pump the water out. Placing this circular rubber mat over the sump will prevent rain and other contaminants from getting inside the fuel storage tanks. The durability of the mat will also protect the top cover of the sump from physical harm, such as vehicles driving over them.
<u>Diamond-Grip:</u>	This mat features diamond-grip corrugations, enhancing its users' traction while offering an industrial aesthetic to any gas station.
<u>Outdoor Friendly:</u>	Since this large rubber mat is made from rubber, it can be left outdoors in all types of weather conditions. This rubber is vulcanized for added resilience, and it is designed to withstand the weight of heavy vehicles.
<u>Cleaning:</u>	This rubber mat is a low-maintenance product that is very easy to clean. For best results, simply use a wet cloth or a mop with a simple commercial cleaning solution. Please do not use caustic cleaning agents such as bleach.
<u>Availability:</u>	Generally in Stock.
<u>California Prop 65:</u>	 WARNING: Cancer and Reproductive Harm - www.P65Warnings.ca.gov .
