

“Grip Tight” Rubber Stair Mats

Specifications
August 2023

<u>Description:</u>	These rubber treads are perfect for protecting your friends and family from hazardous and slippery staircases! Like their name would suggest, these mats grip tightly to the soles of shoes or stocking feet to provide excellent traction and a slip-resistant surface. The Grip Tight rubber stair mats are made from 100% natural and recycled rubber materials so they are an eco-conscious, durable, and affordable matting option.
<u>Material</u>	Natural and reclaimed rubber products
<u>Sizes:</u>	10.25" x 30", 2.5 lbs. per mat
<u>Thickness:</u>	1/8"-inch
<u>Available Colors:</u>	Black.
<u>Applications:</u>	Anti-Slip, commercial stairways, indoor stairs, outdoor stair cases
<u>Sustainable:</u>	Grip Tight rubber stair mats are made from 100% natural and recycled rubber materials. Much of recycled rubber comes from used tires that would otherwise end up in a landfill. By reusing these tires for products like these stair treads you are not only saving yourself money, but you are also protecting the environment and reducing waste left in our landfills!
<u>Traction:</u>	The name says it all! Grip Tight rubber stair mats keep your footing secure regardless of weather or moisture. These mats are perfect for outdoor applications where stairs may become wet and slippery. Placing these treads on heavily trafficked steps gives you the peace of mind that when you, your family, or your friends traverse these stairs there is an extra layer of traction underfoot.
<u>Safety:</u>	The extra traction provided in our Grip Tight stair mats is inherent in the material they are made out of. Rubber is a great safety flooring option because it is resistant to weather, moisture, mold, and mildew that other flooring surfaces are not. Laminate, tiles, wood, or concrete are harder surfaces that provide no cushion or bounce back when slips or falls take place. They also provide no protection for expensive equipment that would be broken if dropped. The safety features of rubber are unmatched, and the durability and long life expectancy of rubber make it dually cost effective!
<u>Installation:</u>	For temporary installations that may require extra assurance, a double-sided tape is more than sufficient to keep these mats in place. For permanent installations using adhesive, installation guides are available upon request.
<u>Cleaning</u>	Simply rinse or wipe these step mats for quick and easy cleaning.
<u>Availability:</u>	In Stock.
<u>California Prop 65:</u>	 WARNING: Cancer and Reproductive Harm - www.P65Warnings.ca.gov .
