

**Description:** This is a rubber flooring roll product made from natural and synthetic rubbers. Terra-Flex rolls are a "premium" floor used for applications requiring a resilient flooring option. This floor imitates the look and feel of granite and is available in light colors and shades that imitate those found in nature, an unusual attribute when it comes to rubber flooring. Granite is an igneous rock formed from magma and has been extensively used as a dimension stone and as flooring tiles in public and commercial buildings and monuments. Aberdeen in Scotland, which is constructed principally from local granite, is known as "The Granite City".

With this "premium" rubber floor we give you and your designer the ability to place granite-like floors on the ground, yet use flexible and soft materials that are much easier on ankles, joints, and backs.

**Material:** Natural Rubber & Synthetic Rubber

**Width:** 48 inch

**Length:** 50ft

**Thickness:** 2mm

**Weight Per Roll:** 130lbs

**Hardness:** 85 +/-5 Shore A Nominal, ASTM D2240

**Density:** 1.5

**Colors:** Concrete, Mount Olympus, Kalahari Desert, Slate Stone

**Temperature Stability:**  $\Delta E < 8$ , ASTM F1514

**Abrasion Resistance:**  $< 0.7$ , ASDTM D4060

**Chemical Resistance:** 23C, 1hr: 2%NaCO<sub>3</sub>, 3%H<sub>2</sub>SO<sub>4</sub>  
DIN 51958  
There is no abnormality when immersed in Alkali or Acid

**Halogen-Free:** Yes  
There was no detection of Fluorine (F), Chlorine (Cl), Bromine (Br), or Iodine (I).

**Linear Dimensional Changes:** CD: +0.2%, ASTM D1204, 80 C, 6hrs  
MD: +0.2%

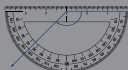

**Fireproof:** Class I, ASTM E648

**Anti-Slip:**  $> 0.6$ , ASTM D2047

**NBS Smoke Density:**  $< 450$ , ASTM E-662

**Cigarette Burn:** After exposing Terra-Flex rubber floors to the tip of a glowing cigarette, there was slight discoloration but no presence of charring.

**Applications:** Airports, Art Studios, Basement Rubber Flooring, Bathrooms, Boats, Clubhouses, Commercial Vehicles, Conference Rooms, Garage Flooring, Gym Flooring, Health Clubs, Home Gyms, Industrial Applications, Kid's Rooms, Laundry Rooms, Locker Rooms, Movie Sets, Music Studios, Play Areas, Rubber Garage Flooring, Show Rooms, Stock Rooms, Trailer Rubber Flooring.

**Earth Tones:** This product is available in earth tones and colors that are rarely found in rubber flooring like recycled rubber products which are limited to dark colors. Terra-Flex rubber rolls come in a variety of attractive colors that can easily complement any décor theme. It comes as close as possible to nirvana "white rubber flooring!"

**Premium Rubber Floors:** Terra-Flex rubber flooring is a "premium" natural rubber and synthetic rubber product. This means that your flooring will be made with the highest quality rubber materials available. Natural rubber and synthetic rubber are inherently high quality and both offer unparalleled durability and protection.

**Rubber Scent Minimized:** Since this product is made from the highest quality virgin rubber products, the rubbery scent present in other recycled rubber flooring rolls is minimized in Terra-Flex.

**Permanent Installations:** Terra-Flex rubber flooring can be permanently adhered to a hard subsurface using BASF Chemrex® CX-941 Adhesive (this product requires a solvent-free adhesive).

**Temporary Installations:** This product can be installed on a semi-permanent basis with double-sided carpet tape. Shurtape DF 545 is the recommended double sided tape. This double-faced cloth tape can be removed cleanly and without leaving any residue behind should this rubber floor product require removal.

**Indoor Rubber Flooring:** This rubber matting product is not recommended for outside use. Extended exposure to sunlight can lead to discoloration in this product.

**Cleaning:** This product can be cleaned using everyday household cleaners or cleaning implements. Indoor cleaning involves a broom, damp mop, or vacuum cleaner.

**Natural Flooring:** This product has a high content of natural rubber. Natural rubber sap is a sustainable resource that is harmlessly extracted from Para rubber trees and gives this product its enhanced durability and elasticity. Not only is this product durable and aesthetically pleasing, it is also an environmentally friendly flooring option!

We have produced two videos shot in Malaysian and Indian rubber plantations depicting this sustainable method of rubber production. To become better acquainted with natural rubber and its extraction from trees please visit: [http://www.rubbercal.com/Video\\_Blog.html](http://www.rubbercal.com/Video_Blog.html).

**Custom Cuts:** Buy this rolled product in any length. Custom lengths up to 50 feet are available so as to limit waste, lower overall costs, and make installation easier for the consumer.

**Availability:** The Terra-Flex flooring rolls are usually inventoried in every color and shipped within 24 hours of purchase. Even custom-cut orders can ship within 24 hours.
